

Updating, Deleting, Creating, Inserting

16 December 2021 17:15

Q. Write a query that all your employee gets **increased their salary by 1000** and **update** your database
update emp set salary = salary + 1000

Q. **edit the name of an employee at eno = 2**

Update emp set ename = "George" where eno = 2

Update emp set salary = 5000 where eno = 1

DELETING

Delete from emp
(all rows will be deleted)

Rollback (to get all rows back)

Q. Delete all the rows where deptno = 10
Delete from emp where deptno = 10

CREATING

Create table emp (column1 datatype, column2 datatype,.....)
Fact : int varchar() are most used datatypes in sql

INSERTING

Insert into emp (column1, column2,.....) values (value1, value2,)
